

HERITAGE TEAS (PVT) LTD  
HERITAGE TEAS PREMIUM SERVICES (PVT) LTD

## Welcome to Our World

### Managing Director's Message

The foundation of my company was laid in 1994 on the bedrock of the experience and knowhow I had already gained during the course of the first part of my work experience which commenced in 1972. I had served both British multinational companies as well reputed Ceylonese tea companies which had track records of over a century in doing business on an international scale. This also included extensive overseas training I received in London, Africa and India. I brought this vast and rich experience and knowledge acquired, when I embarked on founding my own company, carefully selecting a band of hand-picked personnel, possessing a cross section of skills to support me in my adventure. The skill sets we possess within have now grown exponentially and we now have a team of highly experienced well trained and skilled tea professionals working alongside the original team raising the range and of high-end services we now offer to blue chip customers worldwide including leading multi-national companies. Our senior management team includes my three sons.

Their active engagement has assured all who engage with us in regard to succession and has encouraged me to confidently invest in the business both in terms of time and resources to secure its future.

Sound business principles and values shared by all who work with us supported by world renowned conglomerates placing their confidence and trust in us have enabled us to deliver as promised with adherence to strict international quality criteria using state of the art technology and this combination of factors has propelled the company to the position it now enjoys at the very pinnacle of suppliers of top quality teas from Sri Lanka.
