

HERITAGE TEAS (PVT) LTD

T93 | URUMAYA | VICTOR'S TEA | HERITAGE TEAS | FAIZA

Our Story

Since 1993

With over 29 years of blending the first cup of tea to tea lovers, every sip has a unique flavour and promotes the true essence of Ceylon Tea. Sri Lanka has placed a mark on the world map for Ceylon Tea being one of the best produced and has captured the tea drinkers across the globe.

Heritage since its inception has strived on experience and knowledge to blend the best cup of tea and supply quality conscious customers worldwide. Our founder Mr. Anel De Silva has 50 years of experience. Today, the business has passed down to the next generation.

As golf is a huge part of the family, the game has influenced the business. Working with multiple buyers, Japan and Heritage Tea association goes back many years. Over the years, Heritage has expanded its business to many countries in Asia, Europe, Middle East, Oceania and American regions.

The story has inspired the founder and every employee that is working in our company.

What We Do

Why Choose Us

Heritage exports over 10 million kg of tea to over 50 countries, Japan is the oldest partnership. Our team of tea professionals have a collective experience exceeding 200 years backed by state of the art manufacturing facilities. The organization has established an effective food management systems that is based on a continuous process of improvement. The food safety and management systems specify each tea product from selecting, blending, packing and exporting.

Heritage has large storage facilities in which we can store up to 2,200MT at any given time. There are 3 separate state of the art tea cleaning, processing and blending facilities working strictly up to Japanese accepted quality standards which is capable of manufacturing up to 22,000MT per annum. We are able to produce any type of tea bag products (Staple free) in double chamber, single chamber, pot bags and pyramid bags, as well as loose tea products in packets, tins together with shipments of large quantities of tea in bulk which is supplied to long established quality conscious brand owners and multinational companies worldwide.

The HACCP team and the staff of the organization have conducted several kinds of research on the process of production. The stages of development and implementation of the food and safety management system are ensured with the ISO 22000:2005 international standards.

IRON PEARL
The Altitude Ranging Below 2,000ft

Iron Pearl is a unique tea variety that is grown in the high mountains of the region. It is known for its distinctive iron-rich flavor and its ability to withstand the harsh conditions of the high altitude. The tea is harvested in the early morning and is processed in a traditional way. The tea is known for its ability to withstand the harsh conditions of the high altitude. The tea is harvested in the early morning and is processed in a traditional way.

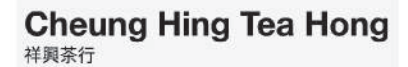

DURUMA
DISTINCTLY UNIQUE
The Altitude Ranging Below 2,000ft

It is an old and 'young' tea. The tea is known for its distinctive iron-rich flavor and its ability to withstand the harsh conditions of the high altitude. The tea is harvested in the early morning and is processed in a traditional way. The tea is known for its ability to withstand the harsh conditions of the high altitude. The tea is harvested in the early morning and is processed in a traditional way.
